RE: Update Regarding Shortages for 2019 Season

Dear Canaan Fir Customer:

Thank you for your purchase of seedlings from Canaan Fir Tree Co. The seedlings are in the process of being packed and shipped to our location in Granville. We received an update regarding final count of seedlings lifted from the ground at our grower on the West Coast.

Due to unforeseen environmental issues at our grower, our available number of seedlings has been tremendously diminished. We have exhausted all sources of competing Canaan Fir suppliers and given up Timbuk Farm's entire Canaan Fir order for our 2019 planting season to supply our customers with as many seedlings as possible to fill orders. For this reason, we will be shorting all customers of all sizes of our Canaan Fir.

We have a limited number of Fraser Fir P+1 which can be substituted for shorted Canaan Fir, on a FIRST COME FIRST SERVED basis.

We understand this causes a major inconvenience to our loyal customers. This is an issue out of our control, which came to our attention days ago and unfortunately a risk of the farming industry. We will be sending out revised documentation with final numbers in the next few days. An update on our pick up and shipment dates will be posted on our website www.canaanfir.com.

Sincerely,

Jim Gibson
President
